

Since 1984 **APC Technology** has provided specialist computer systems for applications in some of the most severe environments on earth. **APC Technology** designs and manufactures state of the art computer/control technology packages for industrial and military clients who have critical applications where failure is not an option.

Maritime vessels have unique requirements due to space restrictions and require a full understanding of the applications specific to this environment for any solution to be effective. **APC Technology** designs and manufactures proven hardware solutions to meet specific situations and is capable of providing the computing solution to suit your application requirements.

Displays of varying dimensions featuring touch screens, viewing enhancement technologies and various mounting arrangements.

Panel PCs and PCs designed specifically for use in military, industrial and other rugged environments.

Keyboard, trackball and input device range for any environment.

MIL-Spec UPS units for Naval and rugged mobile environments

Rugged Mobile Solutions providing your computing applications on the move

“We continually liaise with the customer at all stages to ensure that performance requirements are met and that any solution provided by APC remains relevant”

Message Handling Terminals

The CCM1008 is fully compliant and tested to MIL-STDs and designed to minimise the use of space available in compact environments such as submarines and ship control centres.

Reliability and maintainability are achieved through a secure housing (resistant to heat, humidity and shock), with maximum accessibility for reduced Mean Time To Repair (MTTR).
