

Tough Computers for Tough Conditions

For over 20 years **APC Technology** has provided a range of mobile solutions to our customers for use in deployed applications. Our range of system options allow for user definable systems to be derived quickly and easily for most field applications.

Our systems are available as modular or stand alone packages and are suitable for applications which require installation into air, land or naval vehicles as well as more portable applications for personal systems of a wearable nature.

Ruggedised to withstand extreme conditions we have a proven solution for all environments which can be further configured to your specific mission requirements.

These systems are further supported with full tactical and analysis software giving superior access to real time data comprising threat identification and incident analysis and reporting.

View our range of options, from compact, slimline wearable systems through to full military grade in-vehicle systems online at www.apctechnology.com.au/solutions-mobile.html and contact us today to discuss a custom fit solution for your requirements.

Ideal for use in

Military

Emergency Vehicle

Utility/Field Service

Transportation and Distribution
