

Tough Computers for Tough Conditions

Designed for environments where temperature is extreme in nature, our range of high temperature systems are ideal for harsh environments as found in the mining industries.

As such, **APC Technology** are uniquely placed to provide totally integrated solutions designed for all extremes of industrial or defence operations.

The HT62045 is a high temperature computer designed for use in environments where the temperature is extreme in nature.

All metal construction and IP66 sealing make it ideal for harsh environments as found in the mining and oil & gas industries.

Main Features & Benefits

- Fully sealed to IP66
- Steel construction
- Optional roxtec gland system
- Suitable for use in Mining and Oil & Gas applications

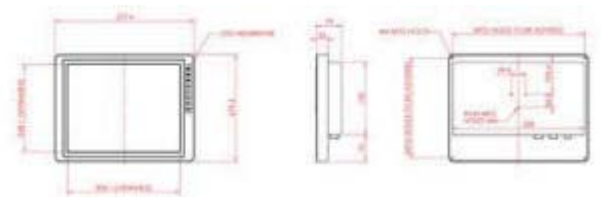

The ET series offer superior performance in industrial environments where temperature and vibration are extreme.

Available in panel mount or fully sealed configurations, these displays and Panel PCs provide a proven cost

effective industrial computing solution to meet your requirements.

Main Features & Benefits

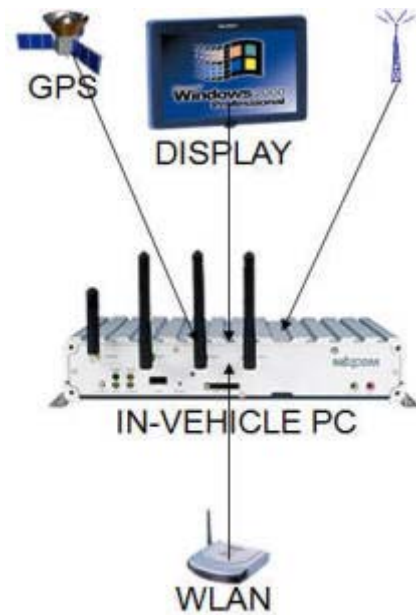

- Fully sealed to IP66
- Steel construction
- Shock & Vibration resistant
- Display enhancement technology for sunlight readability

In-vehicle computers for remote monitoring and computing on the go. Design of the system allows the end user to easily define and build requirements.

Main Features & Benefits

- Extremely low power consumption
- Wide operating temperature range
- Compliance with vehicle industry standards
- Range of communication protocols including GPS, wireless and Bluetooth for communication on the go

Rugged Mobile Computing in numerous platform configurations dependent on exact requirements.

Tablet, PDA, Convertible Tablet/Laptop

Main Features & Benefits

- Magnesium alloy construction
- Wide operating temperature range
- IP and MIL-SPEC rated
- Fully featured with extensive options to provide exact fit for requirements

Products showcased are a small sample of the products and capabilities that **APC Technology** is able to offer. Contact Us now to arrange a complete overview and presentation.

"We continually liaise with the customer at all stages to ensure that performance requirements are met and that any solution provided by APC remains relevant"

Since 1984 **APC Technology** has provided specialist computer systems for applications in some of the most severe environments on earth.

APC Technology designs and manufactures state of the art computer/control technology packages for industrial and military clients who have critical applications where failure is not an option. APC's heritage of engineering excellence is found in new, innovative products that are solving real-life challenges for customers and end users. Customers from all over the world come to **APC Technology** when failure in the field is not an option.

APC Technology's new catalogue is a representation of its product range and its expertise in working with clients to provide an ideal solution.
